Your project milestone report will be 2 — 3 pages using the provided template. The following is a suggested structure for your report:

Title, Author(s)
Problem Overview: Describe the problem you are solving. State it as precisely as you can.
Data: Which data are you using; how did you collect it?
Method: What method or algorithm are you using. Are you using an existing library to do so? Did you introduce any new variations to these methods? How will you evaluate the results? Which baselines will you compare against?
Intermediate/Preliminary Experiments & Results: State and evaluate your results up to the milestone
Related work: Summarize at least five related research papers related to your project. How is your project similar/different?
Who does what: State which group member is responsible for which aspects of the project.
Timeline: What are the remaining steps you plan to complete, and when do you plan to complete them?
References: list of references cited in your report.
Submit the report as a PDF file in the root folder of your project repository under milestone.pdf.
